

**TO WHOMSOEVER IT MAY CONCERNED****PRODUCT APPRECIATION CERTIFICATE**

We are pleased to certify that we have been using more than 2000 numbers of 'Eetamax' brand industrial LED lighting fittings in our various plant areas, starting since 2012.

We have used various Eetamax products like Highbays, Streetlights, Flood lights, Office lights, Paint shop lights, Inspection booth lights, etc. over the years. Eetamax has also provided us with some retrofit solutions in our existing flameproof lights & canopy lights. The technical expertise of Eetamax is commendable.

Most of these lights are used for 12 hours per day, whereas in some areas the consumption is upto 24 hours per day of continuous use.

More than 200 high bays that were supplied in 2012 are installed in factory areas with 16 to 24 hours of daily use. These Eetamax lights have completed more than 50000 burning hours of product life after installation, and are still working comfortably with negligible lumen depreciation.

Eetamax's way of working is also technical-oriented. After conducting a detailed survey to study our plant lighting conditions, Eetamax suggested their various products to suit our applications from the point of view of improving energy efficiency as well as eye comfort. Before execution they have practically proved technical superiority for all the technical parameters like – Lux level, Wattage, Current, Power Factor, Total Harmonic Distortion, and Fixture Temperature.

We are very much satisfied with the light quality & performance of Eetamax lighting systems.
